- ☒ Tight binding may cause shadows or distortion
along interior margin/
La reliure serrée peut causer de l'ombre ou de la
distorsion le long de la marge intérieure
- ☐ Blank leaves added during restoration may appear
within the text. Whenever possible, these have
been omitted from filming/
Il se peut que certaines pages blanches ajoutées
lors d'une restauration apparaissent dans le texte,
mais, lorsque cela était possible, ces pages n'ont
pas été filmées.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

Les exemplaires originaux dont la couverture en
papier est imprimée sont filmés en commençant
par le premier plat et en terminant soit par la
dernière page qui comporte une empreinte
d'impression ou d'illustration, soit par le second
plat, selon le cas. Tous les autres exemplaires
originaux sont filmés en commençant par la
première page qui comporte une empreinte
d'impression ou d'illustration et en terminant par
la dernière page qui comporte une telle
empreinte.

Les cartes, planches, tableaux, etc., peuvent être
filmés à des taux de réduction différents.
Lorsque le document est trop grand pour être
reproduit en un seul cliché, il est filmé à partir
de l'angle supérieur gauche, de gauche à droite,
et de haut en bas, en prenant le nombre
d'images nécessaire. Les diagrammes suivants
illustrent la méthode.

HOT AIR FURNACES.

Our experience in *selling* and *setting* Furnaces has given us a knowledge of the wants of the community in this line of goods which few possess.

The success which has attended our efforts in thoroughly satisfying our patrons, is, we believe, unprecedented in the Dominion. We have thus gained a reputation in the business which is valuable to us; and our endeavors shall be, in all the goods we are introducing, to maintain and increase our hold upon the public favor.

Considering the matter of *economy, durability* and *saving of labor*, and also as a matter of *health*, the Hot Air Furnace is by far the most desirable means of heating. We invite Trustees, School Boards, Builders, Dealers, and all in need of heating arrangements, to investigate these Furnaces.

We are prepared to make estimates, at short notice, for heating Churches, School-houses, Stores, Halls, Dwellings, and buildings of all kinds.

Plans for Setting Furnaces, Price Lists, Estimates, and all information furnished promptly upon application.

BOYNTON'S WOOD FURNACES.

These Powerful Heaters, which have been subjected to severe tests during the past ten winters, have given universal satisfaction, and it is generally admitted by those who have the largest experience in setting Wood Furnaces that they have more attractive improvements and more power, with a given amount of fuel, requiring less attention and producing a more uniform temperature than any wood furnace now in use.

BOYNTON'S IMPROVED FURNACE.

FOR COAL.

The Improved Boynton Furnace, so universally known and extensively used throughout the country, is made especially for the multitude, who want a furnace simple in construction, durable, with heavy castings, perfectly free from gases, and powerful in heating.

The Boyntons have been sold since 1858, with the various improvements added, yet so durable have they proved that many are in use today that were set twenty years ago. This one feature makes them the cheapest Furnace, when price is considered, ever sold. The New Oinker-Cleansing, Anti-Friction, Shaking and Dumping Grate is the most perfect Oinker Grate now made. It moves on balls and requires but little power to shake. Olinkers and ashes can be wholly removed from under the fire without disturbing the body of coal, thereby keeping the pot constantly filled with live coal, free from ashes and clinkers. It is fitted with a Sifting Ash Grate and pan for ashes, by this means clinkers are taken from the ashes without the dust escaping into the apartment—a very desirable convenience—which no other Furnace that we know of is supplied with.

A very important feature of this Furnace is found in the small number of joints, and the form of the castings, which are such that they will not crack, and are made thicker than most Furnaces now in the market. The reputation of the Boyntons being so well established, we recommend them to our customers and the public, confident that they will give entire satisfaction.
